## NO 1 7 JANUARY 1974

### LETTERS TO THE EDITOR

A simple model for the classical one-component plasma	<i>M J Gillan</i>	L1
Condensate spin currents in helium-3	<i>M Vuorio</i>	L5
Application of an inhomogeneous cluster model to the liquid thallium-tellurium system	<i>R J Hodgkinson</i>	L9
Upper critical fields of some ternary molybdenum sulphides	<i>R Odermatt, O Fischer, H Jones and G Bongi</i>	L13
Spin diffusion in $\text{RbMnF}_3$	<i>J W Tucker</i>	L16
Temperature dependence of methyl group tunnelling rotation frequency	<i>S Clough and J R Hill</i>	L20
A model for a temperature-dependent frequency distribution of methyl group tunnelling splittings	<i>P S Allen</i>	L22
Behaviour of collective volume excitations in aluminium near the 'critical wavevector': transition into single-particle excitation	<i>Peter Zacharias</i>	L26

### PAPERS

The structure of cubic $\text{ZrO}_2\text{:YO}_{1.5}$ solid solutions by neutron scattering	<i>D Steele and B E F Fender</i>	1
Disorder in a film of gold deposited on silicon: investigation by low-energy electron diffraction	<i>H Lipson and K E Singer</i>	12
Soft modes and the structure of ferroelectric tetragonal KTN: II. The lattice dynamics of the cubic phase	<i>G Zaccai and A W Hewat</i>	15
Mössbauer and optical activity of the defect modes in crystals with interstitial impurities	<i>D Vamanu</i>	25
Multiple scattering by non-muffin-tin potentials	<i>A R Williams and J van W Morgan</i>	37
Exact results for the density of states of a cluster	<i>C López, F Ynduráin and F J Ynduráin</i>	61
Self-consistent theory of localization: II. Localization near the band edges	<i>R Abou-Chakra and D J Thouless</i>	65
A molecular calculation of electronic properties of layered crystals: I. Truncated crystal approach for hexagonal boron nitride	<i>Alex Zunger</i>	76
A molecular calculation of electronic properties of layered crystals: II. Periodic small cluster calculation for graphite and boron nitride	<i>Alex Zunger</i>	96
Electronic charge densities for two layer semiconductors— $\text{SnS}_2$ and $\text{SnSe}_2$	<i>C Y Fong and Marvin L Cohen</i>	107
High pressure electrical and phase properties of $\text{Hg}_3\text{Te}_3\text{--Ga}_2\text{Te}_3$ alloys	<i>J H Morrissy, G D Pitt and M K R Vyas</i>	113
Metal-insulator transitions and Hund's rule coupling in degenerate narrow bands	<i>K A Chao</i>	127
Drift mobility, trapping and photogeneration of charge carriers in $\beta$ -metal-free phthalocyanine single crystals	<i>G A Cox and P C Knight</i>	146
The Nernst-Ettingshausen coefficient in n-type silicon	<i>W Dunstan and D W Sear</i>	157
Universality and crossover in an Ising-like model	<i>M A Moore, D M Saul and Michael Wortis</i>	162
Contribution of $\text{Fe}^{2+}$ ions to the magnetocrystalline anisotropy constant $K_1$ of $\text{Fe}_{3-x}\text{Ti}_x\text{O}_4$ ( $0 < x < 0.1$ )	<i>E J Fletcher and W O'Reilly</i>	171
Conductivity and spin-wave stiffness in disordered systems—an exactly soluble model	<i>R B Stinchcombe</i>	179
Magneto-optical properties of the F centre in $\text{KMgF}_3$	<i>F A Modine and E Sonder</i>	204
Calculation of anharmonic spin-lattice relaxation in NaCl	<i>A Pietilä</i>	211

Fine structure of the B band in alkali halide:Sn <sup>2+</sup> crystals	<i>Taiju Tsuboi, Keiko Oyama and P W M Jacobs</i>	221
The average energies, <i>W</i> , required to form an ion pair in liquefied rare gases	<i>Tan Takahashi, Satoshi Konno and Tadayoshi Doke</i>	230

## NO 2 21 JANUARY 1974

### LETTERS TO THE EDITOR

Photoemission from gallium selenide using synchrotron radiation	<i>R H Williams, G P Williams, C Norris, M R Howell and I H Munro</i>	L29
<sup>17</sup> O ENDOR measurements on the (NiO <sub>6</sub> ) <sup>10-</sup> complex	<i>P Freund</i>	L33
The Zeeman effect in the spectrum of excitons bound to isoelectronic bismuth in indium phosphide	<i>A M White, P J Dean, K M Fairhurst, W Bardsley and B Day</i>	L35
Theoretical x-ray Compton profiles of NaF and MgO	<i>O Aikala</i>	L40

### PAPERS

Phase diagrams for compressible Ising models	<i>S R Salinas</i>	241
On the critical behaviour of the Ising model with impurities—existence of anomalous logarithmic terms	<i>Masuo Suzuki</i>	255
Lattice dynamics of a solid with a screw dislocation	<i>V K Tewary</i>	261
The influence of phonons on low-temperature paramagnetic relaxation	<i>I L Buchbinder and T Paszkiewicz</i>	279
The effect of disorder on the electronic states in some model systems	<i>A Bergmann and V Halpern</i>	289
Electronic structure of the transition-metal monoxides	<i>Belita Koiller and L M Falicov</i>	299
Jahn-Teller effects in orbital triplets I: Second-order contributions for D(T <sub>2</sub> ) ions in cubic crystals coupled to E-type lattice distortions	<i>M Abou-Ghantous, C A Bates, P E Chandler and K W H Stevens</i>	309
Jahn-Teller effects in orbital triplets II: The theory of D(T <sub>2</sub> ) ions in trigonal symmetry	<i>M Abou-Ghantous, C A Bates and K W H Stevens</i>	325
On random walks and the AC conductivity of hopping systems	<i>Elvin J Moore</i>	339
The electronic properties of semiconducting chalcogenide glasses in the series Te <sub>x</sub> (Si <sub>0.24</sub> Ge <sub>0.20</sub> As <sub>0.56</sub> ) <sub>1-x</sub>	<i>A W Levy, Mino Green and W Gee</i>	352
Analytic solution of a simple model for negative differential resistance	<i>T M Hayes</i>	371
Peierls-Fröhlich instability and superconductivity in linear chain crystals	<i>H Gutfreund, B Horovitz and N Weger</i>	383
Low-temperature expansions for Ising models with four-spin interactions	<i>J Oitmaa</i>	389
Magnetic properties of the Hubbard model	<i>P Lacour-Gayet and M Cyrot</i>	400
The magnetic structure of Mn <sub>3</sub> O <sub>4</sub> (Hausmannite) between 4.7K and the Néel point, 41K	<i>G B Jensen and O V Nielsen</i>	409
Electron paramagnetic resonance in NaCrS <sub>2</sub>	<i>P R Elliston</i>	425
The electric quadrupole interaction in ZrO <sub>2</sub> and HfO <sub>2</sub>	<i>Y Yeshurun and B Arad</i>	430
Second-order Raman effect in alkaline earth oxides	<i>M Buchanan, R Haberkorn and H Bilz</i>	439
Comparison of the optical and dielectric properties of crystalline and molten lithium fluoride	<i>D G Mead</i>	445
Spectroscopic study of Nd <sup>3+</sup> ions in paramagnetic and antiferromagnetic GdAlO <sub>3</sub>	<i>C Coulon and N Pelletier-Allard</i>	454
Resonance interaction between optically active molecules in a crystal	<i>L A Dissado</i>	463

## NO 3 7 FEBRUARY 1974

### LETTERS TO THE EDITOR

Density of localized states in a chalcogenide glass	<i>R M Hill</i>	L45
Isothermal annealing of arsenic-implanted silicon	<i>F Cappellani, G Restelli and L Spinoni</i>	L50

Many-body effects and critical exponents	<i>D W Wood and H P Griffiths</i>	L54
The reduced conductivity of dielectrics when boundary scatter dominates at low temperatures	<i>I F I Mikhail and S Simons</i>	L59

## PAPERS

Kapitza resistance and acoustic transmission across boundaries at high frequencies	<i>L J Challis</i>	481
Tricritical phenomena in constrained systems	<i>Ora Entin-Wohlman, David J Bergman and Yoseph Imry</i>	496
On the free energy of crystal surfaces: II. The configurational free energy of low-index surfaces by low-temperature series	<i>R A Hunt and B Gale</i>	507
Spin-orbit splitting in semiconductor alloys	<i>R Hill</i>	516
Energy-gap variations in semiconductor alloys	<i>R Hill</i>	521
The anisotropic Heisenberg ferromagnet with arbitrary field direction: I. Thermodynamics	<i>T L Reinecke and R B Stinchcombe</i>	527
The anisotropic Heisenberg ferromagnet with arbitrary field direction: II. Correlation functions	<i>T L Reinecke and R B Stinchcombe</i>	548
A comparison of calculated and measured critical temperatures in Heisenberg magnetic materials	<i>M F Collins</i>	573
An electron spin resonance study of the $(\text{OF})^{2-}$ molecular ion in neutron-irradiated $^{17}\text{O}$ -enriched $\text{MgO}$	<i>G Riis, R T Cox, P Freund and J Owen</i>	581
Perturbed $[\text{F}_2^-]$ centres in $\text{KZnF}_3$	<i>L A Kappers and L E Halliburton</i>	589
EPR and ENDOR of titanium-doped lithium fluoride	<i>J J Davies</i>	599
The calculated and measured x-ray K emission bands in Ge, GaAs and ZnSe	<i>J Drahokoupil and A Simunek</i>	610
Silicon-copper and silicon-zinc complexes in gallium phosphide	<i>S R Morrison and R C Newman</i>	619
Silicon donor-acceptor pairs and silicon-carbon complexes in gallium phosphide	<i>S R Morrison and R C Newman</i>	627
The behaviour of boron impurities in n-type gallium arsenide and gallium phosphide	<i>S R Morrison, R C Newman and F Thompson</i>	633
Asymptotic forms for luminescent intensity due to donor-acceptor pair recombination	<i>Lars Onsager and A M Stewart</i>	645

## NO 4 21 FEBRUARY 1974

### LETTERS TO THE EDITOR

Universality and crossover in an extremely anisotropic $n$ -vector model	<i>Amnon Aharony</i>	L63
On the frequency dependence of the electrical conductivity of disordered solids	<i>V Halpern</i>	L68
On the crystalline electric field parameters for the rare earths in Laves phase compounds	<i>R A B Devine</i>	L71

## PAPERS

Thermal conduction in glasses and polymers at low temperatures	<i>G J Morgan and D Smith</i>	649
Thermal expansion and temperature dependence of lattice vibration frequencies of caesium iodide and potassium iodide	<i>C H Panter</i>	665
A microscopic theory of covalent bonding in solids	<i>D C Herbert</i>	669
Compton-effect cross section for the electron gas collective to single-particle transition	<i>K L Kliewer and H Raether</i>	689
Evidence for power law localization in disordered systems	<i>B J Last and D J Thouless</i>	699
$\text{L}_{10}$ electron mobility in GaSb	<i>Joseph Basinski, Denis J E Demars and John C Woolley</i>	716
Warm electron effects in narrow gap $\text{Hg}_{1-x}\text{Cd}_x\text{Te}$ alloys at ambient temperatures	<i>C T Elliott and I L Spain</i>	727
$I$ - $V$ characteristics and stationary dynamics of a Josephson junction including the interference term in the current phase relation	<i>W A Schlup</i>	736

Some calculations on the stability of antiferromagnetic configurations in systems with cubic anisotropy	<i>T J Fairclough</i>	749
Thin ferromagnetic film: Magnetization and spin waves	<i>J C Lévy, J L Motchane and E Gallais</i>	761
A neutron diffraction determination of covalency parameters for $\text{Fe}^{3+}$ and $\text{Cr}^{3+}$ in $\text{FeF}_3$ and $\text{CrF}_3$	<i>A J Jacobson, L McBride and B E F Fender</i>	783
Jahn-Teller effect in the $^3\text{T}_1$ (P) absorption band of $\text{Ni}^{2+}$ in $\text{ZnS}$ and $\text{ZnO}$	<i>U G Kaufmann and P Koidl</i>	791
Electronic spectra of spin-forbidden transitions in mixed $\text{CoCl}_2/\text{CdCl}_2$ crystals	<i>Arthur Mooney, Robert H Nuttall and W Ewen Smith</i>	807
On the photoemission bands due to colour centres in the 310–750 nm region and the effective escape depth of the photoemitted electrons in $\text{CsCl}$	<i>A Soler, L Galan and F Rueda-Sanchez</i>	820
Chemical effects on electron binding energies in yttrium by the x-ray method	<i>V B Singh and B K Agarwal</i>	831

## NO 5 7 MARCH 1974

### LETTERS TO THE EDITOR

Effects of low-energy argon-ion bombardment on $\text{MoS}_2$	<i>H C Feng and J M Chen</i>	L75
Localization of electrons in a linear chain	<i>K A Chao and B Magnusson</i>	L79
Cross-relaxation between Kramers and non-Kramers ions by a quadrupole-electric-field interaction		
	<i>C A Bates, W S Moore, T M Al-Sharbaty, P Steggles, A Gavaix, A Vasson and A-M Vasson</i>	L83
Electron spin resonance of ytterbium-doped cadmium sulphide	<i>J E Nicholls</i>	L88
Generation of high-frequency phonons using a superlattice	<i>D H Martin and G R Dean</i>	L93
The phase transition in the continuous Potts model	<i>Daniel J Amit and A Shcherbakov</i>	L96

### PAPERS

Thermodynamics of internal strain in perfect crystals: II Further régimes	<i>R W Munn and R J Newham</i>	841
Thermodynamics of internal strain in perfect crystals: III. Piezoelectric and related properties	<i>R W Munn and R J Newham</i>	848
A new method of saddle-point location for the calculation of defect migration energies	<i>J E Sinclair and R Fletcher</i>	864
Broadening of resonance lines by charged dislocations	<i>A M Stoneham</i>	871
Stochastic interpretation of the rate equation formulation of hopping transport theory	<i>P N Butcher</i>	879
The electrical properties of n-type epitaxial $\text{InP}$ in the temperature range 5 K to 700 K	<i>P Blood and J W Orton</i>	893
Hopping conduction at high electric fields in transition metal ion glasses	<i>I G Austin and M Sayer</i>	905
Local densities of states on adsorbates on a narrow-band solid	<i>F Cyrot-Lackmann, M C Desjonqueres and J P Gaspard</i>	925
High-frequency magnon damping in Heisenberg antiferromagnets	<i>K P Bohnen, C R Natoli and J Ranninger</i>	947
Photo-induced changes in the magnetic anisotropy of silicon-doped yttrium iron garnet	<i>B T Sharp and R W Teale</i>	965
Theory of highly anisotropic ferromagnets: III. Relationship between microscopic and macroscopic anisotropy and magnetostriction in HCP ferromagnets	<i>M S S Brooks and T Egami</i>	979
Proton magnetic resonance and internal motions in some tetramethyl ammonium compounds	<i>M Mahajan and B D Nageswara Rao</i>	995
Polarized Mössbauer absorption studies on single crystals of ferrous ammonium sulphate		
	<i>T C Gibb</i>	1001
Decay functions in the presence of fast (eg distortion) polarization	<i>N E Hill</i>	1015
Vacuum ultraviolet reflectivity spectra of the molybdenum and tungsten dichalcogenides	<i>H P Hughes and W Y Liang</i>	1023

## NO 6 21 MARCH 1974

### LETTERS TO THE EDITOR

Lattice dynamics of lithium niobate

*M R Chowdhury, G E Peckham, R T Ross and B H Saunderson* L99

Comment on 'Electron localizations by density fluctuations' *T P Eggarter and Morrel H Cohen* L103

On the response of arbitrary finite order and its relation to imaginary-time correlation functions  
*R P Wehrum and H Hermeking* L107

### PAPERS

On some classical vector models in statistical mechanics *M V Romero and P-A Vuillermot* 1033

The critical properties of the two-dimensional  $xy$  model *J M Kosterlitz* 1046

Dynamics of a simple model for a structural phase transition *L Sasvári and Szépfalusy* 1061

Electrostatic potential in orthorhombic ionic crystals *F Y Hajj* 1069

A generalization of the augmented plane wave method

*Luiz G Ferreira, José R Pereira, Dina Lida and Augusto Agostinho* 1076

Multiple scattering within finite and infinite systems of generalized muffin-tin potentials.

Generalizations of the cluster equations, the Lloyd-formula and the KKR equations *P Ziesche* 1085

Coherent potential theory of a random binary alloy: effects of scattering from two-sites clusters and off-diagonal randomness

*Kishin Moorjani, Tomoyasu Tanaka, Martin M Sokoloski and Shyamalendu M Bose* 1098

The crystal field integrals of  $V_3Ga$  *G Barak M Weger* 1117

Screening of charged impurities in semiconductors in intense magnetic fields *P R Wallace* 1136

Analysis of deep and shallow trapping of holes in anthracene

*M Gamoudi, N Rosenberg, G Guillaud, M Maitrot and G Mesnard* 1149

Brillouin scattering measurements of off-axis acoustic energy distribution in semiconducting CdS

*J Attal and J P Laurenti* 1160

A mechanism for negative differential resistance in III-V and II-VI semiconductors associated with the enhanced radiative capture of hot electrons *B K Ridley* 1169

Ising ferrimagnetic models: I *G M Bell* 1174

Ising ferrimagnetic models: II *G M Bell* 1189

Neutron crystal field spectroscopy and susceptibility in  $Er_{1-x}Al_x$

*H Heer, A Furrer, E Walker, A Treyvaud, H-G Purwins and J Kjems* 1207

Photomagnetism of M centres in  $SrF_2$  *P J Call, W Hayes and P H S Smith* 1214

Optical properties of  $LiF:Mn$  *R K Bagai, R K Jain and A V R Warriar* 1219

Corrigenda 1224

## NO 7 7 APRIL 1974

### LETTERS TO THE EDITOR

Ion distribution and long-range order in concentrated electrolyte solutions

*R A Howe, W S Howells and J E Enderby* L111

Note on the space group of magnetite

*Emil J Samuelson* L115

The vortex ring nucleation rate due to negative ions travelling near the Landau velocity in He II

*A Phillips and P V E McClintock* L118

On the free energy of crystal surfaces *G H Gilmer, K A Jackson, H J Leamy and J D Weeks* L123

Electrical and chemical changes in the surface region of chalcogenide glasses

*A W Levy, Mino Green and R T Harley* L126

Acoustic-wave second-harmonic generation in nondegenerate semiconductors in the presence of a magnetic field

*Satish K Sharma and Anil K Agarwal* L130

Some electrical properties of silicon and germanium on a pseudopotential approach

*S Jogi and J Behari* L134

Low-temperature conductivity of  $NaCl + Cr^{3+}$  crystals

*M Hartmanová, E Mariani and M Lébl* L137

Phonon frequency shifts in the compressible Ising model	<i>J Oitmaa</i>	L140
Studies on the magnetic behaviour of the $\text{Mn}_3\text{O}_4$ - $\text{NiMn}_2\text{O}_4$ system	<i>G T Bhandage and H V Keer</i>	L142
Dynamic polarization and relaxation of protons in the glycerol:Cr(V) complex	<i>J Svoboda</i>	L144
Electron paramagnetic resonance of $\text{ZnS}:\text{Sc}^{2+}$	<i>I Broser and M Schulz</i>	L147
Far-infrared absorption in amorphous and crystalline GeSe	<i>J M Chamberlain, S S Sirbegović and P M Nikolić</i>	L150

## PAPERS

Applications of thermodynamic perturbation theory to polar and polarizable fluids	<i>I R McDonald</i>	1225
Analysis of the second-neighbour Ising model	<i>I G Enting</i>	1237
Negative isotope effect of the lattice resonant models in $\text{Li}^+$ -doped KCl crystals	<i>G K Pandey, D K Shukla and A Pandey</i>	1242
Anomalous effective mass in $\text{MoS}_2$	<i>P G Harper</i>	1247
Positron annihilation in a single $\text{TiO}_2$ crystal	<i>D Tsur, M Blau and M Weger</i>	1257
Colour centre studies by positron annihilation in KCl irradiated by light	<i>S Dannefer, G Trumpy and R M J Cotterill</i>	1261
Transient and alternating currents in insulators or semiconductors: influence of generation and recombination of carriers	<i>R Meaudre and G Mesnard</i>	1271
Exchange scattering in Ti-doped Al/Al oxide/Ag tunnel junctions: I. Zero magnetic field	<i>A F G Wyatt and R H Wallis</i>	1279
Exchange scattering in Ti-doped Al/Al oxide/Ag tunnel junctions: II. Magnetic field	<i>R H Wallis and A F G Wyatt</i>	1293
3d transition elements in tunnel junctions	<i>A F G Wyatt</i>	1303
Tunnelling in metal-semiconductor contacts: II. Influence of the electron-phonon interaction	<i>R Combescot and G Schreder</i>	1318
Interpretation of the crystal-field parameters in a rare-earth substituted $\text{LiYF}_4$ crystal	<i>Vishwamittar and S P Puri</i>	1337
Studies of the magnetic structure of $\text{Fe}_3\text{P}$	<i>E J Lisher, C Wilkinson, T Ericsson, L Häggström, L Lundgren and R Wappling</i>	1334
A study of the two-magnon Raman scattering in the Heisenberg antiferromagnets $\text{CoF}_2$ and $\text{FeF}_2$ using a realistic model hamiltonian	<i>C Castellani, F Leoni and C R Natoli</i>	1353
The full symmetry of the photoelastic tensor of elastic waves	<i>E Anastassakis and E Burstein</i>	1374
A comparative study of zircon ( $\text{ZrSiO}_4$ ) and hafnion ( $\text{HfSiO}_4$ ) Raman spectra	<i>J H Nicola and H N Rutt</i>	1381
Electron spin resonance and optical studies of the double-hole ( $\text{V}^0$ ) centre in $\text{MgO}$	<i>Lawrence A Kappers, Frisic Dravnieks and John E Wertz</i>	1387
On the origin of bound exciton lines in indium phosphide and gallium arsenide	<i>A M White, P J Dean and B Day</i>	1400
Photoelectron spectroscopy of crystalline antimony: a comparison with $\text{SnTe}$ spectra	<i>I Abbati, L Braicovich, B De Michelis and A Fasana</i>	1412

## NO 8 21 APRIL 1974

### LETTERS TO THE EDITOR

On the mathematical equivalence of Grüneisen's and Brillouin's formulae for the thermal expansion of solids	<i>Dominique Ceccaldi, Michel Ghelfenstein and Henri Szwarc</i>	L155
How good is the surface molecule picture?	<i>M J Kelly</i>	L157
Speculation on the Fermi surface of $\text{NbSe}_2$	<i>H P Hughes and W Y Liang</i>	L162
Exact transition temperature of the Potts model with $q$ states per site for the triangular and honeycomb lattices	<i>D Kim and R I Joseph</i>	L167
Magnetic properties of $\text{CuS}_2$	<i>F Gautier, G Krill, P Panissod and C Robert</i>	L170
Fisher renormalization in systems with finite specific heat	<i>Volker Dohm</i>	L174

## PAPERS

The critical exponents of Ising model systems with pure three-body interactions: III	<i>D W Wood and H P Griffiths</i>	1417
Intensity fluctuations of Brillouin scattered laser light from amplified vibrational waves	<i>W Wonneberger, J Lempert and W Wettling</i>	1428
The derivation of force constants from phonon frequencies	<i>B Jowet and A Holz</i>	1449
Possible resonances in the mobility of negative ions in liquid helium in the presence of a microwave field	<i>J W Halley</i>	1462
Combined pair-site effective medium theory of the impurity band	<i>Masaru Tsukada</i>	1475
On the existence of the small magnetic polaron	<i>A Aldea and E Teleman</i>	1491
Magnetic behaviour of bismuth at high fields	<i>N L Brignall and D Shoenberg</i>	1499
Nernst-Ettingshausen effects and electron scattering in GaSb	<i>Denis J E Demars, Joseph Basinski and John C Woolley</i>	1504
Two-component induced-moment crystal in a mean-field model. Singlet-singlet system	<i>Eugene Shiles, G Bruce Taggart and Raza A Tahir-Kheli</i>	1515
Bose-operator expansions of tensor operators in the theory of magnetism	<i>Per-Anker Lindgård and Oluf Danielsen</i>	1523
The magnetic properties of $\text{Fe}^{2+}$ ions in $\text{Fe}(\text{NH}_4)_2(\text{SO}_4)_2 \cdot 6\text{H}_2\text{O}$ at low temperatures	<i>J C Gill and P A Ivey</i>	1536
Comparative electron paramagnetic resonance study of $\text{Fe}^{3+}$ and $\text{Gd}^{3+}$ ions in monoclinic zirconia	<i>G Bacquet, J Dugas, C Escribe, J M Gaite and J Michoulier</i>	1551
Calculation of the dielectric function for a semiconductor model	<i>T Lukes and B Nix</i>	1564
Dielectric response in semiconductors	<i>J C Inkson</i>	1571
Temperature and field dependence of the optical absorption edge in amorphous $\text{As}_2\text{S}_3$	<i>R A Street, T M Searle, I G Austin and R S Sussmann</i>	1582
Electroabsorption in disordered solids: selenium	<i>G G Roberts, B S Keating and A V Shelley</i>	1595

## NO 9 7 MAY 1974

### LETTERS TO THE EDITOR

The thermal and electrical conductivities of $\text{LaB}_6$ at high temperatures	<i>Takaho Tanaka</i>	L177
Two phase transitions in the Ashkin-Teller model	<i>F Y Wu and K Y Lin</i>	L181
Magnetic circular dichroism of $\text{UO}_2$ in the 13000–17000 $\text{cm}^{-1}$ range	<i>E R Vance</i>	L185

## PAPERS

Three-spin-state generalized Ising model	<i>S Alexander and G Yuval</i>	1609
Tricritical scaling laws in an anisotropic compressible Ising model	<i>David J Bergman, Ora Entin-Wohlman and Yoseph Imry</i>	1621
Transverse current correlations and shear viscosity in simple liquids	<i>T Gaskell</i>	1631
High-field transport in gallium arsenide and indium phosphide	<i>W Fawcett and D C Herbert</i>	1641
Galvanomagnetic effects of arsenic (25.5 at %)–antimony alloy single crystals	<i>Y C Akgöz and G A Saunders</i>	1655
Effect of random defects on the critical behaviour of Ising models	<i>A Brooks Harris</i>	1671
Excitations in the Heisenberg ferromagnet using the coherent potential approximation	<i>A B Harris, P L Leath, B G Nickel and R J Elliott</i>	1693
A method of moments applied to the diluted ferromagnet	<i>B G Nickel</i>	1719
Selfconsistently renormalized spin-wave approximation for some two-dimensional magnetic systems	<i>E Rastelli, A Tassi and L Reatto</i>	1735
Calculation of x-ray and photoelectron emission of solids with a semi-empirical LCAO method: graphite	<i>Eeva-Kaarina Kortela and Rolf Manne</i>	1749
The microwave Faraday effect in p-type tellurium	<i>H Kahlert and H O Haller</i>	1757

LETTERS TO THE EDITOR

- The approach to the incoherent limit in high- $Q$  inelastic neutron scattering from an amorphous tetrahedrally bonded semiconductor *D Weaire and R Alben* L189  
 The phase transition in magnetic systems with a singlet ground state *T H Cheung* L192  
 Nuclear spin-lattice relaxation times in BCC  $^3\text{He}$  *N S Sullivan and M Chapellier* L195

PAPERS

- The specific heats of  $^7\text{LiH}$  and  $^7\text{LiD}$  at low temperatures *B Yates, G H Wostenholm and J L Bingham* 1769  
 The attenuation of phonons in liquid helium at very low temperatures *T J Slukin and R M Bowley* 1779  
 Selection rules for indirect transitions and effect of time-reversal symmetry: II. Full-group procedure *E Doni and G Pastori Parravicini* 1786  
 Analytic properties of the coherent potential approximation and of its molecular generalizations *F Ducastelle* 1795  
 A probabilistic approach to the problem of electron localization in disordered systems and sharpness of the mobility edge *N Kumar and R R Subramanian* 1817  
 Magnetic field induced Anderson transition in hydrogenic impurity bands *B B Suprpto* 1822  
 On the electronic structure of an impurity band: a cumulant approach *F Cyrot-Lackman and J P Gaspard* 1829  
 Numerical studies of the AC conductivity of hopping systems: I. Effects of space and energy disorder *Elvin J Moore* 1840  
 Drift and Hall mobilities of electrons in InSb at 30 and 77 K *G M Dutta, D Chattopadhyay and B R Nag* 1854  
 Critical exponents for the itinerant ferromagnet *Rafael P Moya* 1857  
 Charge compensation in iron-doped rutile *P O Andersson, E L Kollberg and A Jelenki* 1868  
 Magnetic hyperfine interaction studies in haemin *Ademola Amusa, P Debrunner, Hans Fauensfelder, E Munck and G De Pasquali* 1881  
 Evidence of charged dislocations by light scattering in NaCl doped with divalent impurities *I Baltog, C Ghita and M Giurgea* 1892  
 Optical study of  $\text{U}^{5+}$  in zircon *E R Vance and D J Mackey* 1898  
 The rôle of defect interactions in reducing the decay time of H3 luminescence in diamond *M D Crossfield, G Davies, A T Collins and E C Lightowlers* 1909  
 Thermoluminescence of alkali halides irradiated at 80 K *Y V G S Murti and K R N Murthy* 1918

LETTERS TO THE EDITOR

- About the displacement of the lithium ion in lithium fluoride by accelerated electrons *F Herrmann, P Pinard and Y Farge* L199  
 Determination of atomic eigenvector magnitudes by isotopic substitution *Margaret M Elcombe* L202  
 Direct evidence for interactions between elementary excitations in superfluid  $^4\text{He}$  by Raman scattering *Kohji Ohbayashi and Akira Ikushima* L206  
 Technique for rapid solution of the APW secular equation *B N Harmon and DD Koelling* L210  
 The critical correlation function of the Ising model in a magnetic field and on the co-existence curve *J Hubbard* L216  
 Antiferromagnetism in  $\text{Mn}_3\text{TeO}_6$  *P R Elliston, F Habbal, G E Watson and N Saleh* L220  
 Thermorefectance of  $4\text{H-NbSe}_2$  *G Campagnoli, A Gustinetti and A Stella* L223  
 On the Madelung potential contribution to Slater parameter shifts *D J Newman* L227

## PAPERS

The stopping power of solids for low-velocity channelled heavy ions

*J S Briggs and A P Pathak* 1929

Lattice dynamics of manganese fluoride

*G C Cran and M J L Sangster* 1937

Ideal absorbed multilayer thin films: some thermodynamic implications

*Marvin Chester, D F Brewer, L C Yang and K A Etinger* 1949

Adsorption of oxygen at tungsten single crystal: the (110) face

*K W Ashcroft, J H Leck and E M Williams* 1965

Theory of resistivity of metals

*W Jones* 1974

Force correlation theory of resistivity

*L E Ballentine and W J Heaney* 1985

An investigation of the energy relaxation of warm electrons in indium phosphide by means of the magnetophonon effect

*L Eaves, R A Stradling, S Askenazy, R Barbaste, G Carrère, J Leotin, J C Portal and J P Ulmet* 1999

Dynamic properties of one-dimensional Heisenberg magnets

*S W Lovesey* 2008

Magnetic ordering of rare earth monochalcogenides: I. Neutron diffraction investigation of CeS, NdS, NdSe, NdTe and TbSe

*P Schobinger-Papamantellos, P Fischer, A Niggli, E Kaldis and V Hildebrandt* 2023

Theory of the magnon and phonon interaction in FeF<sub>2</sub>: II. Magnetic-field effects

*S W Lovesey* 2039

Magnetic excitations in FeCl<sub>2</sub>

*S W Lovesey* 2049

Effect of uniaxial stress upon the EPR of Tm<sup>2+</sup> and Yb<sup>3+</sup> in alkaline earth fluorides: correlation with spin-lattice relaxation

*J M Baker and D van Ormondt* 2060

On the behaviour of the Er<sup>3+</sup> ion in nearly cubic crystalline fields

*Vishwamittar and S P Puri* 2077

Corrigenda

2088

## NO 12 21 JUNE 1974

### LETTERS TO THE EDITOR

Distinction between optical absorption edges and photoemission edges in solids

*A B Kunz* L231

A study of electron binding at the isoelectronic nitrogen centre in GaP and InGaP

*S F Ross and M Jaros* L235

### PAPERS

On the critical behaviour of anisotropic systems

*A D Bruce* 2089

Some invariance properties of the renormalization group

*F J Wegner* 2098

Magnetic phase transitions on elastic isotropic lattices

*F J Wegner* 2109

Experimental study of the critical-point behaviour of the hydrogen in palladium system: I. Lattice gas aspects

*Y de Ribaupierre and F D Manchester* 2126

Experimental study of the critical-point behaviour of the hydrogen in palladium system: II.

Specific heat

*Y de Ribaupierre and F D Manchester* 2140

The observation of critical behaviour in the thermal expansion of PbZr<sub>0.9</sub>Ti<sub>0.1</sub>O<sub>3</sub>

*R Clarke and A M Glazer* 2147

The long-range potential in the scattering of atoms from surfaces

*J L Beeby and E G Thomas* 2157

A new approach to the CPA and its generalizations

*A R Bishop and Abhijit Mookerjee* 2165

Ortho-para-positronium quenching by transition metal ions in glass

*A Paul, R M Singru, C Dauwe, L Dorikens-Vanpraet and M Dorikens* 2180

Small-signal characteristics of GaAs, InP and n-Ge at high fields

*B Vinter* 2187

The angular dependence of the magnetoresistivity of bismuth

*Z Sümengen, N Türetken and G A Saunders* 2204

Effects of nonellipsoidal nonparabolic band structure on longitudinal magnetoacoustic phenomena in bismuth

*Chhi-Chong Wu and Jensen Tsai* 2211

Green function theory of a dense electron gas with surface: I. Work function

*Volker Peuckert* 2221

Far infrared studies of Cr<sup>2+</sup> in MgO

*B R Anderson, L J Challis, J H M Stoelinga and P Wyder* 2234

Nature of luminescence from YAG:Cr<sup>3+</sup>

*J P Hehir, M O Henry, J P Larkin and G F Imbusch* 2241

Two-component induced-moment crystal in a mean-field model. Singlet-triplet system	
<i>Eugene Shiles, Raza A Tahir-Kheli and G Bruce Taggart</i>	2487
The magnetic and nuclear electric quadrupolar axes of ferrous ions in sites of distorted octahedral symmetry	<i>J C Gill</i> 2497
Magnetization process and the critical field of the Ising model with first- and second-neighbour interactions	<i>Shigetoshi Katsura and Susumu Fujimori</i> 2506
Inelastic neutron scattering in orthorhombic $\text{KNbO}_3$	<i>R Currat, R Comès, B Dorner and E Wiesendanger</i> 2521
Field dependance of forced magnetostriction in cubic ferro-, ferri- and antiferromagnets	<i>A del Moral and M S S Brooks</i> 2540
Zeeman effect of the $\text{Cu}^{2+}$ centre in cubic $\text{ZnS}$	<i>Manfred Wöhlecke</i> 2557

# NO 15 7 AUGUST 1974

## LETTERS TO THE EDITOR

Effect of topological disorder upon the vibrational spectra of three-dimensional systems	<i>R J Bell</i> L265
The pitch-independant critical field in cholesteric liquid crystalline poly- $\gamma$ -ethyl-L-glutamate	<i>K Tohyama</i> L270
The spatial extent of localized state wavefunctions in silicon inversion layers	<i>M Pepper, S Pollitt and C J Adkins</i> L273
Comment on soft x-ray absorption by alkali halide crystals	<i>T Åberg and J L Dehmer</i> L278
On the dynamics of the singlet-triplet ferromagnet	<i>M Blume and R J Birgeneau</i> L282
Soft mode dynamics of the singlet-triplet ferromagnet	<i>M E Lines</i> L287

## PAPERS

Computation of a random packing of hard spheres	<i>A J Matheson</i> 2569
Excitations and atomic transport in classical binary isotopic fluids	<i>M Parrinello, M P Tosi and N H March</i> 2577
Reorientation and degrees of binding of $\text{X}^{2+}$ -vacancy complexes in $\text{KCl}$	<i>A Brun and P Dansas</i> 2593
Positron annihilation in coloured $\text{KCl}$	<i>L Smedskjær and S Dannefer</i> 2603
Lattice dynamics of magnesium flouride	<i>R Almairac and C Benoit</i> 2614
The interpretation of work-function variation in alkali chemisorption from the atomic viewpoint	<i>J P Muscat and D M Newns</i> 2630
Stochastic interpretation of the rate equation formulation of hopping transport theory: II. The dc limit	<i>P N Butcher</i> 2645
The effects of isolated inclusions upon the transport properties of semiconductors	<i>D J Ryden</i> 2655
Isotope effect in the superconducting palladium-hydrogen-deuterium system	<i>T Skośkiewicz, A W Szafrąński, W Bujnowski and B Baranowski</i> 2670
Singularities of the dilute Ising ferromagnet	<i>C Domb</i> 2677
The cooperative high-spin ( $^6\text{T}_2$ ) $\rightleftharpoons$ low-spin ( $^1\text{A}_1$ ) transition in dithiocyanatobis (4,7-dimethyl-1,10-phenanthroline)iron(II): Mössbauer effect and magnetism	<i>E König, G Ritter and B Kanellakopulos</i> 2681
Dispersion relations for magnetic excitons in $\text{NdAl}_2$	<i>J G Houmann, P Bak, H-G Purwins and E Walker</i> 2691
Are antiferroelectricity and other physical properties 'hidden' in spinel compounds?	<i>Hans Schmid and Edgar Ascher</i> 2697
A study of a Jahn-Teller orbital doublet: $\text{Ni}^{3+}$ in $\text{Al}_2\text{O}_3$	<i>M Abou-Ghantous, C\A'Bates, I A Clark, J R Fletcher, P C Jaussaud and W S Moore</i> 2707
Low-frequency response of $\text{KDP}$ -like crystals in the spin-phonon model	<i>A P Young and R J Elliott</i> 2721
Raman scattering study of the three structural phases of $\text{KMnF}_3$	<i>D J Lockwood and B H Torrie</i> 2729
The electronic structure of chalcogenide solids: a photoemission study of ordered and disordered selenium and tellurium	<i>R H Williams and J I Polanco</i> 2745
Corrigenda	2760

## NO 16 21 AUGUST 1974

### LETTERS TO THE EDITOR

- Propagation of density fluctuations in liquid metals *M I Barker and T Gaskell* L293  
 Critical dynamics at the structural transition of  $\text{KMnF}_3$  from ultrasonic experiment  
*I Hatta, M Matsuda and S Sawada* L299  
 The crystal ionicity of the zincblende and rocksalt compounds as a function of the valence band gap  
*E Louis and F Yndurain* L303  
 On the cyclotron effective mass of GaAs *Fritz Herlach* L308  
 Analysis of trap depths in anthracene by thermal and optical release of injected charge carriers  
*Gordon M Parkinson, John M Thomas and John O Williams* L310  
 Scaling of the order parameter in the anisotropic Ising model *I G Enting* L314  
 Experimental evidence for the residual stress interpretation of transition rounding in  $\text{CoBr}_2 \cdot 6\text{H}_2\text{O}$   
*John J White III* L317  
 Observation of electronic transitions in the far-infrared absorption spectrum of  $\text{CaF}_2:\text{Er}^{3+}$   
*R W Ward and B P Clayman* L322

### PAPERS

- Rigid-ion models of the interionic potential in the alkali halides *D J Adams and I R McDonald* 2761  
 Effect of doping on positron lifetime in Si crystals *P Sen and C Sen* 2776  
 The observation of an order-disorder transition in the Ni-Te system by neutron diffraction  
*P Coffin, A J Jacobson and B E F Fender* 2781  
 Theory of quantum diffusion of atoms in crystals *Yu Kagan and M I Klinger* 2791  
 A pseudo-atom theory for the surface tension of liquid metals *R Evans* 2808  
 Chemisorption theory in the Hartree-Fock approximation *T B Grimley and C Pisani* 2831  
 Path-integral theory of a model disordered system *V Samathiyakani* 2849  
 Cyclotron resonance of polarons in ellipsoidal bands: I. Simple limiting cases *David Larsen* 2877  
 Cyclotron resonance of polarons in ellipsoidal bands: II. The general case *David Larsen* 2890  
 Spin-phonon interactions in a Heisenberg antiferromagnet: I. The spin-wave spectrum  
*M G Cottam* 2901  
 Spin-phonon interactions in a Heisenberg antiferromagnet: II. The phonon spectrum and spin-lattice relaxation rate  
*M G Cottam* 2919  
 The low symmetry EPR spectrum of divalent copper ions in potassium and rubidium sulphate  
*T E Freeman and J R Pilbrow* 2933  
 Coupling between nuclear Zeeman and electronic spin-spin interactions in dielectric solids  
*M Goldman, S F J Fox and V Bouffard* 2940

Superfluids with $l \neq 0$ Cooper pairs: parametrization of the Landau free energy	<i>G Barton and M A Moore</i>	2989
Localization and its absence in CPA calculations	<i>R Haydock and Abhijit Mookerjee</i>	3001
Vertex correction calculations for an electron gas	<i>Petter Minnhagen</i>	3013
Pseudopotential calculation of the surface band structure of Si(111) faces	<i>M Elices, F Flores, E Louis and J Rubio</i>	3020
Polaron cyclotron resonance in AgBr at microwave and infrared frequencies	<i>J W Hodby, J G Crowder and C C Bradley</i>	3033
The DC magnetoresistance of p-type germanium in the hop conduction range	<i>Jan Chroboczek, Andrzej Klokocki and Krzysztof Kopalko</i>	3042
Theory of photoconductivity in amorphous semiconductors containing relatively narrow trap bands	<i>J G Simmons and G W Taylor</i>	3051
Photoconductivity and the determination of trapping parameters in amorphous semiconductors	<i>G W Taylor and J G Simmons</i>	3067
Umklapp surface scattering in a tight-binding model	<i>Richard M More</i>	3075
Upper bounds for the transition temperatures of generalized Ising models	<i>A Brooks Harris</i>	3082
Magnetic susceptibilities in the itinerant model: many-band effects	<i>D G Clark and W Young</i>	3103
Spectroscopic investigation of a metamagnetic phase transition in $\text{DyVO}_4$	<i>A Kasten and P J Becker</i>	3020
Magnetic interactions in gadolinium orthochromite, $\text{GdCrO}_3$	<i>A H Cooke, D M Martin and M R Wells</i>	3133
Cooperative Jahn-Teller effects in the mixed crystals $\text{Tb}_p\text{Gd}_{1-p}\text{VO}_4$ and $\text{Dy}_p\text{Y}_{1-p}\text{VO}_4$	<i>R T Harley, W Hayes, A M Perry, S R P Smith, R J Elliott and I D Saville</i>	3145
The theory of single passage nuclear magnetic resonance on oriented nuclei with small electric quadrupole interactions	<i>P T Callaghan, P D Johnston and N J Stone</i>	3161
Grain-size effects of properties of some ferroelectric ceramics	<i>H T Martirena and J C Burfoot</i>	3182

## NO 18 21 SEPTEMBER 1974

### LETTERS TO THE EDITOR

On relative wavefunctions generated by configuration interaction	<i>J Andriessen, R Chatterjee and D van Ormondt</i>	L339
Neutron scattering from liquid $^3\text{He}$	<i>R Scherm, W G Stirling, A D B Woods, R A Cowley and G J Coombs</i>	L341
Quasi $T_g$ ground state of titanium-substituted alums	<i>Y H Shing and D Walsh</i>	L346
Experimental and theoretical results for the U centre in LiF	<i>J H Beaumont, J Bordas, A J Bourdillon and M R Hayns</i>	L349

### PAPERS

Theoretical determination of the imaginary parts of the atomic scattering factors of Si	<i>M Calamitout and S E Filippakis</i>	3193
Actinide chalcogenides and pnictides: III. Optical-phonon frequency determination in UX and ThX compounds by neutron scattering	<i>F A Wedgwood</i>	3203
Water polymers and polywater	<i>L Pietronero</i>	3219
Orthogonalization procedures in the theory of colour centre hyperfine interactions	<i>A H Harker</i>	3224
$Z_2$ dependence of the electronic stopping power of low-velocity channelled heavy ions	<i>Anand P Pathak</i>	3239
The lattice dynamics of crystalline hydrogen chloride in its low-temperature phase	<i>P J Grout and J W Leech</i>	3245
Quasi-harmonic lattice dynamics of Bravais lattices: I. Mechanisms in central force models	<i>T H K Barron and T G Gibbons</i>	3260
Quasi-harmonic lattice dynamics of Bravais lattices: II. Rhombohedral lattice with short-range central forces	<i>T H K Barron and T G Gibbons</i>	3269
Quasi-harmonic lattice dynamics of Bravais lattices: III. Thermal expansion of a rhombohedral lattice	<i>T H K Barron and T G Gibbons</i>	3287

A model calculation for the $\alpha$ - $\alpha'$ phase transition in metal-hydrogen systems	<i>Heinz Horner and Herbert Wagner</i>	3305
Invariant functions and homogeneous bases of irreducible representations of the crystal point groups, with applications to thermodynamic properties of crystals under strain	<i>A G McLellan</i>	3326
Frictional forces at a rectilinear vortex in liquid helium II	<i>A J Hillel, H E Hall and P Lucas</i>	3341
A comment on the deviations from Stark levels in a finite linear chain	<i>O Entin-Wohlman</i>	3354
Exact expressions for the resistivity	<i>W Jones</i>	3357
Crystal-field splitting of NdS and NdSe	<i>A Furrer and E Warming</i>	3365
The Ginzburg criterion—rationalized	<i>Daniel J Amit</i>	3369
Nuclear spin relaxation by translational diffusion in solids	<i>C A Scholl</i>	3378
Tunnelling magnetic resonances	<i>S Clough and T Hobson</i>	3387
Nonexponential nuclear Zeeman relaxation of tunnelling methyl groups	<i>M Punkkinen and S Clough</i>	3403
Methyl group tunnelling frequency measurement by electron nuclear double resonance in a powder	<i>S Clough, J R Hill and M Punkkinen</i>	3413
Electron irradiation damage in silicon containing high concentrations of boron-lithium pairs	<i>R C Newman and D H J Totterdell</i>	3418
Optical extinction of K colloids in KCl: their size distribution	<i>S C Jain and N D Arora</i>	3427

## NO 19 7 OCTOBER 1974

### LETTERS TO THE EDITOR

Peaked structure appearing in the field effect mobility of silicon MOS devices at liquid helium temperatures	<i>R J Tidey, R A Stradling and M Pepper</i>	L353
Peaked structure appearing in the field effect mobility of silican MOS devices at temperatures above 20 K	<i>R J Tidey and R A Stradling</i>	L356

### PAPERS

Phase transition of the Cayley tree with Ising interaction	<i>J von Heimbürg and H Thomas</i>	3433
Deformation coupling of x-ray scattering factors	<i>John S Reid</i>	3444
X-ray diffraction profiles from neutron-irradiated magnesium oxide	<i>C J Howard and T M Sabine</i>	3453
Phonon spectrum and phonon interactions in corundum	<i>Rosario Cataliotti</i>	3467
Lattice dynamics of some lithium salts	<i>R K Singh</i>	3473
Parametric models and the Ising equation of state at order $\epsilon^3$	<i>D J Wallace and R K P Zia</i>	3480
Critical behaviour of the spherical model with enhanced surface exchange	<i>M N Barber, D Jasnow, Surjit Singh and R A Weiner</i>	3491
Note on spectral limits in a tight-binding model with random parameters	<i>C E Carroll, T Lukes and G A Ringwood</i>	3505
The concentration-concentration correlation function in the long-wavelength limit for binary liquid alloys	<i>S P McAlister and E D Crozier</i>	3509
Single-particle spectrum of the half-filled-band Hubbard model	<i>K Schönhammer</i>	3520
Stochastic interpretation of the rate equation formulation of hopping transport theory: III. DC hopping analogues and their application to percolative conductance networks and spin systems	<i>P N Butcher</i>	3533
An iterative calculation of galvanomagnetic coefficients and AC conductivity of polar semiconductors	<i>B R Nag</i>	3541
Elementary properties of surface polaritons	<i>J Nkoma, R Loudon and D R Tilley</i>	3547
Theory of thermal dielectric relaxation and direct determination of trap parameters	<i>H M Gupta and R J van Overstraeten</i>	3560
Magnetization, magnetocrystalline anisotropy and the crystalline field in (rare earth) $Al_2$ compounds	<i>H-G Purwins, E Walker, B Barbara, M F Rossignol and P Bak</i>	3573
Uniaxial $S = 1$ antiferromagnet	<i>C Vettier</i>	3583
Renormalization of the magnon-phonon interaction in HCP ferromagnets	<i>M S S Brooks and T Egami</i>	3594

Spin-wave interaction effects on the longitudinal dynamical susceptibility in Heisenberg ferromagnets	<i>C R Natoli and J Ranninger</i>	3603
Mössbauer isomer shifts in rare earth compounds: I. General trends	<i>J D Cashion, M A Coulthard and D B Prowse</i>	3620
Nuclear quadrupole couplings and polarizability of the oxygen ion in spinel-structure compounds	<i>R Kirsh, A Gérard and M Wautelet</i>	3633
Thermal annealing kinetics of the F' centre in KCl between 80 and 300 K	<i>C G Cordovilla and J L Alvarez Rivas</i>	3645
Dependence of atomic Compton profiles upon the $X_a$ exchange parameter	<i>R N Euwema and G T Surratt</i>	3655
Photoelectric spectra of SnTe: structural similarity with PbTe and PbSe spectra	<i>I Abbati, L Braicovich and B De Michelis</i>	3661

## NO 20 21 OCTOBER 1974

### LETTERS TO THE EDITOR

Note on universality and the eight-vertex model	<i>K Jüngling and G Obermair</i>	L363
Change in the order of a phase transition induced by axial anisotropy	<i>R Oppermann</i>	L366
Chemical potentials and workfunctions of metal surfaces in the theory of an inhomogeneous electron gas	<i>F K Schulte</i>	L370
Radiation-induced coloration in KBr crystals subjected to AC electric fields	<i>S Govinda</i>	L374

### PAPERS

On the calculation of critical exponents by renormalization group techniques	<i>A D Bruce, M Droz and A Aharony</i>	3673
Acoustic properties of some liquid Tl-Te alloys	<i>Robert Turner</i>	3686
Intensity-dependent acoustic absorption in dielectrics: I. Low intensities	<i>S Simons and I C Simpson</i>	3692
Intensity-dependent acoustic absorption in dielectrics: II. High intensities	<i>S Simons and I C Simpson</i>	3711
The solid-fluid phase transition: contribution of small watermelons	<i>Clive A Croxton</i>	3723
Diamagnetic susceptibility for some ionic solids	<i>K Mansikka and S Mikkola</i>	3737
The effect of electrical field of impurity centres and phonon-electron screening in phonon conductivity of III-V semiconductors at low temperatures	<i>Mahiradhwaj Singh and G S Verma</i>	3743
Image force for a moving charge	<i>J Harris and R O Jones</i>	3751
Effects of random local magnetic fields in the Ising model	<i>J Mizuno</i>	3755
Spin correlation functions and exchange averaging	<i>D E Dugdale</i>	3758
Paramagnetic resonance of $Tb^{3+}$ in $LiY_{0.99}Tb_{0.01}F_4$	<i>I Laursen and L M Holmes</i>	3765
ESR studies of paramagnetic centres in irradiated $Sr(ClO_3)_2$	<i>D Suryanarayana and J Sobhanadri</i>	3770
Slow methyl group tunnelling rotation frequency measurements by electron nuclear double resonance	<i>S Clough, J R Hill and M Punkkinen</i>	3779
Sharpness of transition and effect of tunnelling in ferroelectric Bean-Rodbell model of KDP	<i>R E Nettleton</i>	3785
Vibronic spectra in diamond	<i>Gordon Davies</i>	3797
Supralinearity sensitization in LiF TLD phosphor	<i>V K Jain, S P Kathuria and A K Ganguly</i>	3810

## NO 21 7 NOVEMBER 1974

### LETTERS TO THE EDITOR

The cooperative Jahn-Teller effect for several active ions in the unit cell	<i>G A Gehring</i>	L379
Self-diffusion and electrical conductance in simple molten salt	<i>J P Hansen and I R McDonald</i>	L384
Direct experimental evidence for low temperature anharmonicity in superconducting spinels	<i>P P Dawes, N W Grimes and D A O'Connor</i>	L387
Electron attenuation length in NaCl	<i>F L Battye, J Liesegang, R C G Leckey and J G Jenkin</i>	L390

## PAPERS

Positron annihilation in phase-separated and crystallized silicate glasses	<i>P Hautojärvi and E Pajanne</i>	3817
Relaxed positronium in polymers	<i>M Bertolaccini, A Bisi, G Gambarini and L Zappa</i>	3827
Electrostatic potential in hexagonal ionic crystals	<i>F Y Hajj</i>	3833
Structural studies of boracites. A review of the properties of boracites	<i>R J Nelmes</i>	3840
Structural studies of boracites. The cubic phase of chromium chloride boracite $\text{Cr}_3\text{B}_7\text{O}_{13}\text{Cl}$	<i>R J Nelmes and F R Thornley</i>	3855
Lattice dynamics of $\text{AgGaS}_2$	<i>G F Holah, J S Webb and N Montgomery</i>	3875
Diffusion in liquid mixtures of isotopes	<i>I Ebbsjö, P Schofield, K Sköld and I Waller</i>	3891
Chemical interdiffusion in binary ionic solid solutions and metal alloys with changes in volume	<i>Rauno Lindström</i>	3909
Alternative derivation of the Bohm-Pines theory of electron-electron interactions	<i>Nigel J Shevchik</i>	3930
A note on the density of states of a disordered system with Gaussian random potentials	<i>M Saitoh and S F Edwards</i>	3937
A study of amplified acoustic flux in n-GaAs by Brillouin scattering	<i>R S Sussmann and B K Ridley</i>	3941
Anomalous paramagnetism of $\text{Ni}^{2+}$ perchlorate at low temperatures	<i>Bijoy K Chaudhuri</i>	3962
Jahn-Teller effects in orbital triplets: III. $\text{D}(\text{T}_2)$ ions coupled to $\text{T}_2$ -type lattice distortions	<i>C A Bates, P E Chandler and K W H Stephens</i>	3969
ESR hyperfine investigation of the $\text{V}^0$ centre in $\text{MgO}$	<i>B H Rose and L E Halliburton</i>	3981
Magnetic-resonance studies of $\text{Gd}^{3+}$ ions in $\text{CaO}$	<i>P McGeehin and B Henderson</i>	3988
Fluorescence spectra of $\text{Gd}^{3+}$ ions in $\text{CaO}$	<i>A E Hughes and G P Pells</i>	3997
Corrigenda		4007

## NO 22 21 NOVEMBER 1974

### LETTERS TO THE EDITOR

Anion vacancy migration in $\text{CaF}_2$ lattices and in monoclinic $\text{ZrO}_2$	<i>E Van der Voort</i>	L395
On charge-carrier trapping in insulating solids as investigated by the space-charge-limited current (SCLC) technique: a cautionary note	<i>G P Owen and A Charlesby</i>	L400
Spontaneous polarization of the eight-vertex model	<i>Rodney J Baxter and Stewart B Kelland</i>	L403
Absorption of infrared radiation by neutral donor-pair molecules in III-V and II-VI compounds	<i>Jan Golka</i>	L407

### PAPERS

Hydrodynamic theory of the singlet-triplet model	<i>P C Hohenberg and J B Swift</i>	4009
Critical exponents and many-body effects: IV	<i>H P Griffiths and D W Wood</i>	4021
The shifted eigenvalue problem and phonon frequencies	<i>M F Thorpe</i>	4037
Phase transition in model systems with different $U_3\phi^3$ interactions	<i>A Malaspinas and N Szabo</i>	4043
On the thermal contact resistance between insulators	<i>S Simons</i>	4048
Chemisorption of oxygen on tungsten {100}: combined molecular beam and scanning beam study	<i>Michael G Wells and David A King</i>	4053
The Economou-Cohen localization criterion: effect of clusters and a reappraisal	<i>Abhijit Mookerjee</i>	4069
The memory function in the mode-mode coupling theory for the Heisenberg paramagnet	<i>Magnus Månson</i>	4073
Relaxation-shape function of a Heisenberg paramagnet based on the method of moments	<i>J W Tucker</i>	4089
Magnetic properties of $\text{NdAl}_2$	<i>P Bak</i>	4097
Surface properties of a ferromagnet near the critical temperature: molecular-field approximation	<i>H H Chen and C S Hsue</i>	4104
On certain divergences in the quantum spin wave theory of ferromagnetism	<i>J Szaniecki</i>	4113
EPR studies on the structure of copper dioctadecyl-dithiocarbamate monolayers	<i>Pierre-Alain Chollet</i>	4127
NMR of $^{59}\text{Co}$ in trisacetylacetonatocobalt (III)	<i>E C Reynhardt</i>	4135

Magneto-optical study of the $^3A_2 \rightarrow ^1E^a$ transition in magnetic crystals $KNiF_3$ , $Rb_2NiF_4$ , $K_3Ni_2F_7$ , $RbNiF_3$	<i>R V Pisarev, J Ferré, R H Petit, B B Krichevskov and P P Syrnikov</i>	4143
Far-infrared spectroscopy of bound and free electrons in III-V and II-VI semiconductors: I. Transitions between excited states observed in Zeeman spectroscopy of the shallow donor impurities	<i>P E Simmonds, J M Chamberlain, R A Hoult, R A Stradling and C C Bradley</i>	4164
Photoluminescence in single-crystal chalcogenides in the system $As_2Se_{3-x}S_x$	<i>R A Street, I G Austin, T M Searle and B A Smith</i>	4185

## NO 23 7 DECEMBER 1974

### LETTERS TO THE EDITOR

Calculations of an effective pair interaction potential for liquid neon from structure factor measurements	<i>M Brennan, P Hutchinson, M J L Sangster and P Schofield</i>	L411
Critical behaviour of $A_2$ -type modes in the vicinity of the $\alpha$ - $\beta$ phase transition of quartz	<i>François Gervais</i>	L415
Possible model states for the B phase of superfluid $^3He$	<i>M A Moore, M Vuorio, T Haavasoja and H J Vidberg</i>	L418
Hydrostatic pressure resistivity variation in n-type $ZnSiP_2$ , $CdSiP_2$ and $CdGeAs_2$	<i>M K R Vyas and G D Pitt</i>	L423
The critical correlation function of the Ising model in a magnetic field and below the critical temperature	<i>J M Bissett</i>	L427
An EPR analysis of Yb, Er and Sm centres in strontium fluoride	<i>R C Newman and R J Woodward</i>	L432

### PAPERS

Dynamic structure factors and neutron scattering in molten salts	<i>M C Abramo, M Parrinello and M P Tosi</i>	4201
On relations between the symmetries of elastic constants and stability conditions	<i>G C Cran and M J L Sangster</i>	4213
Some p-wave phases of superfluid helium-3 in strong-coupling theory	<i>G Barton and M A Moore</i>	4220
A LEED study of $MgO(100)$ : I. Experiment	<i>K P Legg, M Prutton and C Kinniburgh</i>	4236
Symmetrization of low-energy electron diffraction patterns	<i>J Rundgren and A Salwén</i>	4247
A RHEED study of the growth of antimony on tungsten (110)	<i>B J Hopkins and G D Watts</i>	4259
The de Haas-van Alphen effect in n-InSb and n-InAs	<i>N L Brignall</i>	4266
Many-body effects and the high-field Hall coefficient	<i>R B Stinchcombe</i>	4277
Quantum anomaly in acoustic parametric interaction	<i>E Mosekilde, D G Carlson and A Segmüller</i>	4281
The dilute Ising model in a transverse field	<i>R J Elliott and I D Saville</i>	4293
The coherent potential approximation for the diluted antiferromagnet	<i>William K Holcomb</i>	4299
Spin waves in antiferromagnets with alternating strong and weak coupling	<i>E J Samuelsen and M Melamud</i>	4314
Magnetoelastic waves and a group-theoretical determination of selection rules for magnon-phonon interactions in antiferromagnetic $FeCl_2$	<i>A P Cracknell</i>	4323
On the electrical conductivity, dielectric constant and magnetic susceptibility of $EuWO_4$ single crystals	<i>H B Lal, Naseeb Dar and Ashok Kumar</i>	4335
The acoustic paramagnetic resonance of rare-earth-doped calcium fluoride	<i>V W Rampton</i>	4346
Non-Lorentzian diffusion-broadened Mössbauer lines	<i>Ian Heilmann, Boye Olsen and Jens Højgaard Jensen</i>	4355
The metal-nonmetal transition in $VO_2$ : $A^{57}Fe$ Mössbauer study	<i>C Blaauw and F van der Woude</i>	4361
Application of Kramers-Kronig relations to the interpretation of dielectric data	<i>R Lovell</i>	4378
Quantum oscillations of spin-flip Raman scattering in InSb	<i>B S Wherrett and S Wolland</i>	4385
Spectroscopic transition probabilities of rare earth ions	<i>J E Lowther</i>	4393
Thermoluminescence of $CaSO_4$ doped with rare earths	<i>K S V Nambi, V N Bapat and A K Ganguly</i>	4403
Photoemission studies of the band structures of transition metal dichalcogenides: I. Groups IVA and IVB	<i>F R Shepherd and P M Williams</i>	4416
Photoemission studies of the band structures of transition metal dichalcogenides: II. Groups VA and VIA	<i>F R Shepherd and P M Williams</i>	4427

## LETTERS TO THE EDITOR

Optical phonon frequencies in KCl from solutions of one-electron equations	<i>J S Melvin and P Lyden</i>	L437
Anticrossing effects in phonon scattering	<i>B R Anderson and L J Challis</i>	L440
sp <sup>3</sup> tight-binding interactions for disordered networks	<i>G P Betteridge</i>	L446
Measurements of critical fields up to 500 kG in the ternary molybdenum sulphides	<i>Ø Fischer, H Jones, G Bongi, M Sergent and R Chevre</i>	L450
Relative intensities in crystal field spectra of Co <sup>2+</sup> ions in A <sup>II</sup> B <sup>VI</sup> crystals	<i>J Gardavsky</i>	L454
Image formation in NMR by a selective irradiative process	<i>A N Garroway, P K Grannell and P Mansfield</i>	L457

## PAPERS

Thermodynamic properties of one-dimensional dilute Ising systems with interaction impurities	<i>Y Termonia and J Deltour</i>	4441
Far-infrared absorption in imperfect crystals: low-concentration theory	<i>S N Behera and R S Tripathi</i>	4452
Phonons in mixed crystals: a self-consistent theory including mass and force-constant changes	<i>R S Tripathi and S N Behera</i>	4470
Thermal expansion of caesium bromide and potassium bromide	<i>C H Panter</i>	4483
Some electron beam effects on CO/W(100), C <sub>2</sub> H <sub>4</sub> /W(100) and tungsten carbide	<i>M A Chesters, B J Hopkins, A R Jones and R Nathan</i>	4486
Coulomb interaction effect from the atomic limit to the band limit	<i>K A Chao and B Magnusson</i>	4493
Plasmon coupling to core hole excitations in carbon	<i>A M Bradshaw, S L Cederbaum, W Domcke and U Krausse</i>	4503
The critical concentration for magnetic order in solid solutions of UO <sub>2</sub> with ThO <sub>2</sub> and ZrO <sub>2</sub>	<i>T M Sabine, G B Smith K D Reeve</i>	4513
Raman spectra of carbonates of calcite structure	<i>H N Rutt and J H Nicola</i>	4522
Optical absorption dips caused by vibronic antiresonances in ZnSe: Ni and ZnSe: Ti	<i>J M Baranowski, J M Noras and J W Allen</i>	4529
X-ray fluorescence L spectra of niobium in niobium metal and some of its compounds	<i>M K Bahl and A S Koster</i>	4537
